

MOST HUR 955 / 997 (HEAD UNIT REPLACEMENT) NTV-KIT155 / NTV-KIT210

The MOST-HUR 955 / 997, Porsche Head Unit Replacement Interface, provides audio integration into the stock Porsche amplified sound system. It allows the end-user to replace their factory radio with an aftermarket Navigation / DVD head unit while retaining the factory amplifier and speakers. Installation is easy, with only 5 wires connected to the vehicle, an included antenna adapter and a MOST fiber optic extension.

The MOST-HUR 955 / 997 supplies illumination, VSS (vehicle speed pulse), foot brake, parking brake signals and infrared steering wheel commands to Kenwood or Alpine (only) aftermarket radios. (most vehicles)

For: 2003 to 2010 CAYENNE / 2005 to 2012 BOXTER, 911, CAYMAN
*MERCEDES BENZ HEAD UNIT REPLACEMENT ALSO AVAILABLE. CONSULT NAV-TV APPLICATION CHART WHEN ORDERING.

2014 & SPRINTER CAMERA KIT NTV-KIT477

The SPRINTER CAM KIT provides a backup camera input into the factory color LCD radio, allowing the end-user to install an aftermarket reverse camera while retaining the factory system. Installation is all plug-and-play behind the radio. This kit supports 2014 & up Mercedes Benz Sprinter Vans with a full color LCD radio.

We also have available the OEM SPRINTER VAN CAMERA.

For: 2014 & UP MERCEDES BENZ SPRINTER VAN

UCT-13 / UCT-13+ / UCT13-5 KIT NTV-KIT424 / NTV-KIT425 / NTV-KIT438

The UCT-13 is a rear camera, front camera, a/v input and Navigation integration interface for the 2013 & UP RAM and 2014 & UP Grand Cherokee, Durango & Viper with the 8.4" and 5" inch U-CONNECT screen.

This kit allows a rear view camera image to be automatically displayed on the factory screen. This kit also has the ability to display the camera at any time via the factory buttons while the display on the factory LCD Gauge cluster tells you what mode you are selecting.

For: 2013 & UP RAM / 2014 & UP JEEP GRAND CHEROKEE and DURANGO / 2015 & UP CHALLENGER / 2013 & UP VIPER. * AV input is not supported on the 5" Uconnect, only RVC.

AUDI 09 EXT MMI KIT NTV-KIT187

The AUDI09-EXT MMi Kit is a rear view camera and video integration module for Audi vehicles with the 3G MMi system.

The rear view image appears automatically when the vehicle is placed into reverse. The AUDI09-EXT MMi has a dedicated rear view camera input, aftermarket RGB Navigation input, and 3 additional video inputs for external sources such as a DVD player, FLIR night vision camera, or iPod video. The unit activates through a wire trigger or the provided momentary switch. The unit has audio switching that, combined with the factory audio input, will provide a true audio and video integration experience.

For: 2009 & UP AUDI. Vehicle needs to have the knob that controls the radio on the Center console.

BMW 09 KIT NTV-KIT174

The BMW09 Kit is a rear view camera and video integration module for BMW vehicles starting in 2009 and UP.

The rear view image appears automatically when the vehicle is placed into reverse. The BMW09 has a dedicated rear view camera input, aftermarket RGB Navigation input, and 3 additional video inputs for external sources such as a DVD player, FLIR night vision camera, or iPod video.

The unit activates automatically via CAN or the provided momentary switch. The unit has audio switching that, combined with the factory audio input, will provide a true audio and video integration experience.

For: 2009 & UP BMW

ALLGIG-XG-HS / FT NTV-KIT260 / NTV-KIT272

Plug and play multi-function interface for CHRYSLER / DODGE / JEEP / VW equipped with the MyGIG touchscreen radio.

Enables viewing of the factory DVD or VES display in motion. Additionally, it allows entering navigation destinations without stopping the vehicle on navigation equipped MyGIG radios.

The following features are available:

- Enables automatic backup camera input when in reverse.
 - Enables VES Emulation mode for auxiliary audio/video input.
 - Enables a video output to display the built-in DVD image on aftermarket monitor(s).
 - Enables a full-time video input for a front and / or rear camera and / or FLIR Night Vision system.
 - Enables Bluetooth and voice recognition on RER radios. (Requires optional microphone assembly)
 - Enables an external navigation display input for international use.
- *Consult NAV-TV application chart when ordering.

CAMERA 6 NTV-KIT299

The CAMERA 6 is very small universal rear view camera featuring a super high-quality Sony HAD II CCD camera. It can be mounted in any vehicle that has a knockout in the trunk lid lip, or similar location.

The CAM 6 operates in extremely low light (0.01 Lux) and has a 160° field of view. The enclosure is ruggedized, automotive grade metal, completely waterproof (IP68) and is ideal for most installations.
