Dependable power is a key component in any listening environment. The power needs to be clean, clear, and reliable. AudioControl amplifiers run cool, delivering authoritative power and pristine sonic performances while providing bulletproof reliability to last, quite literally, a lifetime.

ACM series amplifiers by AudioControl are the perfect blend of power and features for car audio systems from mild to wild. Compact size, high power and the ability to help integrate with factory stereo systems are features that assure "Making Good Sound Great" can happen in any installation.

Reversible cover plates allow flexible mounting options when paired with AudioControl DM Series Processors or when using multiple ACM series amplifiers in confined spaces. Once again AudioControl comes to the rescue combining features and benefits needed to assure audio euphoria in an automotive setting.
