RadioPRO ADVANCED Stinger® HEIGH10® Install Kits

Complete Stinger HEIGH10 Ready to install Installation Kits.

Factory-contoured plastics that perfectly and professionally mount the Stinger HEIGH10 multimedia infotainment system into specific vehicles, while retaining vehicle-specific OE features, like HD reverse camera, performance gauges, and more.

RadioPRO Integrated Kits

Everything you need to install a new aftermarket radio in one box. Factory-matching aesthetics, reliable feature retention (RadioPRO) module, and time-saving plug-and-play harnesses will ensure a quality and professional installation.

Radio Replacement Interfaces

RadioPRO ADVANCED: Representing PAC's latest integration technologies, RadioPRO ADVANCED offers greater features and performance in a smaller package! PAC-LINK expansion capabilities enable seamless connectivity with Stinger radios and many other future accessories.

RadioPRO: The RadioPRO line is your all-in-one installation tool, giving you the optimized installation of an aftermarket radio while enabling you to retain the car's important factory features.

Basic Digital Interfaces

C2R & OS – PAC's legendary line of C2R and OS radio replacement interfaces allows you to effectively replace your factory radio without losing the factory features (requires SWI module to retain steering wheel controls). OS modules are developed to retain OnStar.

Radio Replacement Accessories: With vehicle-specific USB port retention cables, add-on chime output modules, video output retention cables, and more, PAC rounds out its radio replacement offerings with feature and vehicle-specific solutions for installations where simplified products get the job done.

Basic Analog Interfaces

ROEM – These radio replacement interfaces are designed for older, analog factory radio replacement.

Steering Wheel Control Interfaces

ControlPRO (SWI): Advanced steering wheel control interfaces with versatile configuration options. ControlPRO products can be configured from your smartphone or computer.

About Rostra Quick-Touch

Rostra's recently-updated mirror/monitor product line now includes a technology that we call Quick-Touch. Put simply, Quick-Touch is a way of providing drivers with easy access to the video being streamed from the camera supplying video to the secondary input by pressing and holding the mirror's power button. This option makes Rostra's rearview mirrors an ideal solution for adding a side-view or forward-facing camera for blindspot visibility.

Multi-Camera Mobile Digital Video Recording

Rostra's 250-8901A is the most advanced modular in-vehicle video recording system on the market and includes a discretely-mountable control module with the ability to record audio and video from up to four cameras at once. The system's sophisticated on-screen display menu allows users to control myriad DVR features and installers can extend the device's functionality with GPS capability with an externally-mounted antenna (available separately). Video records to a standard SD card (Class 10 up to 256GB), or to an external hard drive connected to the 250-8901A's USB port.

Features

- Search and view previously recorded events.
- Event triggered recording.
- Full motion video and audio data.
- Firmware-driven menu system.
- GPS compatible (receiver sold separately).
- 3 Year/36,000 mile warranty.
- Tamper-proof and lockable security enclosure.
- High quality H.264 profile video compression.
- Total record resource up to 30fps per channel.
- Available with single or four channels.
- Panel lock with (2) keys for security.

Available with Multiple Camera Options or BYOC (Bring Your Own Camera)

The 250-8901A is available with a variety of Rostra's heavy-duty cameras as a kit or it can be added to vehicles with previously-installed cameras to enable video recording. Example solutions below:

250-8934

Tailgate Camera Relocation

Retain backup camera and surround-view camera

Typical LVDS (digital) camera relocation kit components

Camera Relocation kits allow installers to retain backup and surround-view camera system functionality when a vehicle's tailgate or bed have been removed from the truck to add aftermarket equipment such as service bodies, a fifth-wheel towing apparatus, slide-in campers, swing-out tire carriers, and more.

Relocate your factory installed tailgate camera with ease. Relocation is as easy as 1, 2, 3.

1. Unplug your OEM camera from under the truck.
2. Install the relocation housing with the (included) pre-mounted OEM camera and mount to any flat surface.
3. Run the camera harness to the factory camera plug behind the bumper and re-connect. The camera will function the same as before, just in a different location.

Hands-Free Bluetooth® Systems

Rostra's add-on Bluetooth® systems easily add hands-free audio streaming from a mobile device to vehicles equipped with a basic radio, including phone calls and music, through the factory sound system. Plug-n-Play kits are available for most popular vehicles with a hard-wired option for universal applicability.

Rostra's Bluetooth® module uses a custom t-harness to connect to the factory radio wiring to stream audio over the vehicle's speakers.

Parking Assistance Systems, Blind Spot Detection with Rear Cross-Traffic Alert, and Backup Alarms

Rostra's forward and rear-facing parking assistance systems are an industry-leading accessories designed to give every driver peace-of-mind while maneuvering their vehicle in situations where space is narrow. These systems provide both visual and audible alerts to the potential dangers of nearby obstacles through the use of an included buzzer built into a digital display that can be mounted on your sun visor or dashboard. These systems will automatically engage and alert the driver to the presence of obstacles within each of their detection zones.

Vehicle Speed-Limiting, Electronic and Mechanical Cruise Control Systems

Curb aggressive driving in your fleet with speed limiters from Rostra. Rostra speed-limiting kits allow fleet owners to set a hard-coded maximum driving speed for their vehicle which cannot be modified or tampered with by the driver once installed. Rostra speed limiters are a one-time purchase with no rolling subscription fees, typically take 1-2 hours to install, and are available for most popular fleet vehicles with set speeds of 65, 70, 75, and 80 miles per hour *. Visit rostra.com to view all applications.

Typical speed-limiter kit components include the control module, accelerator pedal interface harness, and power/ground harness.

Electronic Cruise Control Systems

Why drive when you can cruise? All-electronic add-on cruise control systems by Rostra are available for most popular fleet vehicle applications on the road today including light-duty trucks and work vans. Visit rostra.com to view all applications.

POWER LIFTGATE SERIES

About the Product

Our goal with the new Power Liftgate Series was to provide the best in OEM style, performance and reliability. Our rigorous Research and Development spanned over 18 straight months involving a complete kit analysis of each of the applications. This involved improvement of inferior components, full digital and physical fitment analysis and color printed vehicle specific documentation and a direct to consumer feedback campaign involving DIY (Do-It-Yourself) installations and detailed feedback reports to ensure the utmost satisfaction.
