FULLY INTEGRATED REMOTE START / SECURITY SYSTEM WITH BUILT-IN FLCAN

The Flashlogic line of Remote Start, Vehicle Specific Data Start Modules and Transponder/Doorlock Interface Modules are the most advanced and comprehensive line-up in the industry today. The program consists of three separate product offerings, designed to meet the needs of every Security & Remote Start Installer for today's complex vehicles. The entire Smartphone Flashlogic line-up was developed in conjunction with Automotive Data Solutions (ADS) and brings together the advanced technology of ADS with the core security and remote start features of the VOXX product lines. Smartphone Flashlogic is the gateway to the vehicle's electronic system – the ultimate in vehicle integration.

FLRSBA

PROGRAMMABLE REMOTE START & SECURITY SYSTEM

The FLRSBA Security & Remote Start System can be updated with over 100 different firmware versions, covering 7600+ vehicle applications, and installation is a breeze with the built-in dual FLCAN. It also incorporates dual built-in data converters allowing dealers to add any Prestige, Code Alarm or Pursuit transmitter kit without the need of an external data converter. The FLRSBA is also compatible with SmartStart, for Telematics control, and you can add additional security protection with the optional BASEC. The FLRSBA is also compatible with available T-harnesses for thousands of plug-in vehicle applications.

FLRSBA COMPONENTS AND OPTIONAL ACCESSORIES

ADSAHRPWR

HIGH CURRENT 6-PIN STARTER HARNESS

The High Current (HC) harness is used for analog remote start applications where the heavier gauge wire is required.

DIGITAL SIGNAL PROCESSOR (DSP)

- THROUGH AN LCD DISPLAY AND INTUITIVE INTERFACE, IT ALLOWS REAL-TIME AUDIO ADJUSTMENTS
- 2 INPUT CHANNELS DIGITAL DSP WITH BUILT-IN REMOTE OUT CONTROL
- 15 BAND INPUT GRAPHICS EQUALIZER
- INPUT AND OUTPUT ROUTING - SOURCE A AND B TO EACH OUTPUT
- HIGH AND LOW PASS FILTER FOR EACH CHANNEL - OPTIONS OF SLOPE:
BUTTERWORTH: 12/18/24/36/48 dB/Hz
LINKWITZ-RILEY: 12/18/24/36/48 dB/Hz
- GAIN CONTROL: RANGE -45dB TO +15dB
- PHASE INVERSE CONTROL / ALIGNMENT - DELAY CONTROL
- LIMITER PER CHANNEL

OEM INTEGRATION

Every make, model, and year of vehicle is different, so installation of an upgraded audio system can be tricky. Most factory radios today are so much more than just a radio; they're generally the command center for the vehicle. Changing them can be very expensive, if it's even possible, and you usually don't get much of an improvement in sound. With industry leading features such as our load Matching Circuit, intuitive channelarming, patented AccuBASS® compensation, GTO™, Signal Series, signal delay and EG, AudioControl active line output converters are the goto choice for OEM integration.

POWER AMPLIFIERS

SA-1200

5.0-1500

14.000

AudioControl has paired our award-winning amplification technology with powerful Multi-Digital Signal Processing into the D4-800™, D4-1200™, and D5-1300™. AudioControl's D4 SmartDSP app allows complete control over 30 bands of EQ, signal delays, phase correction, and level boost. Features like patented AccuBASS™, GTO™ Signal Sense and ABE™ plus on integrated input and output faders.

MODEL	DESCRIPTION
ACK-300.2	Two Channels Of Output, IP66 rated, 70W x 2 at 4Ω, 150W x 2 at 2Ω, 300W total output
ACK-600.1	Mono Output, IP66 rated, 330W x 1 at 4Ω, 600W x 1 at 2Ω, 1200W total output at 2 ohms
ACK-600.6	Six Channels Of Output, IP66 rated, 70W x 6 at 4Ω, 100W x 6 at 2Ω, 600W total output at 2 ohms. Compact all-metallic design.
ACK-8T3	Three Zones/Six Channels Of Output, IP63 rated, 40V RCA outputs
ACK-3.2	8 ohm, Six Channels of up to 3V RCA Output, Conformally coated PCB, No enclosure included, All output is extendable (max of 16V RCA output)

ACX ALL-WEATHER AMPLIFIERS

ACX-600.1

ACX-300.4

AudioControl ACX™ All-Weather Amplifiers are built tough from solid aluminum extrusions, sealed tight against the elements, and ready for your next adventure. Fully sealed quick-connect wiring, and a water-tight chassis add up to an IP66 rating, ensuring ACX amplifiers deliver the pure, uninterrupted power AudioControl is known for.

ACM MICRO AMPLIFIERS

ACM™ series amplifiers by AudioControl are the perfect blend of power and features for car audio systems from mild-to-wild. Compact size, high power and the ability to help integrate with factory stereo systems are features that ensure "Walking Good Sound Great" can happen in any installation. Reversible cover plates allow flexible mounting options when paired with AudioControl DA Series Processors or when using multiple ACM series amplifiers in confined spaces.

BASS RESTORATION PROCESSORS

THE EPICENTER

THE EPICENTER MICRO

THE EPICENTER INDASH

For over twenty-five years, AudioControl's The Epicenter™ has been the most sought after bass restoration processor on the planet. The Epicenter contains a bass maximization circuit that accurately recovers and injects low frequency information back into the signal path, providing more low frequency bass impact to your favorite music.

PREAMP LINE DRIVERS

Give your system the boost that it needs. The high headroom power supply of our line drivers raises any preamp signal up to 24 dB. This provides better dynamic range and a quiet, noise-free signal. Perfect for driving those long cable runs from the front to the back of the vehicle and achieving maximum sound quality and SPL.

Adjust volume output from the comfort of the driver's seat with the optional ACR-1 remote.

PROCESSORS & EQUALIZERS

Maximize overall system performance! AudioControl's equalizers offer precise control to compensate for factors that interfere with sound quality. Adjust your system's response for your car's acoustics and your personal musical preferences. Dial in your front stage even more with built-in signal delay in the DDX™.

IN-DASH AUDIO EQUALIZERS

AudioControl's Three-2 in-dash equalizer is a true audiophile quality product in a half-din chassis. Using an after market head unit, tablet, or any other source with analog outputs, compensate for the acoustics of the vehicle, and recapture the excitement and vibrancy of concerts. Auxiliary inputs allow connection of a record source.

DIGITAL SIGNAL PROCESSORS

These highly versatile digital signal processors contain the power of AudioControl processing through the flexible, accessible and uncomplicated DM Smart DSP™ app. Configure channel summing, 20 bands of EQ, signal delay and phase correction, plus AudioControl proprietary features like AutoBASS®, GTO™, Signal Sense, and MTC™. Integrated input and output I/O's aid in channel summing and equalization.

Connect the optional AC-BT24 for Bluetooth® HD audio streaming and programming.

APSW-6000BTU

The APSW-6000BTU is a multimedia marine head unit with a 3" bright white-LED illuminated LCD display for optimum viewing, even in full sun. This compact unit is easily mounted in a 3" round mounting hole and is IP66 rated and element proof to protect against dust, UV, temperature, water, corrosion & vibration.

APSW-7500BTU

The APSW-7500BTU is a multimedia marine head unit with a 3" full color TFT LCD display for optimum viewing. Even in full sun, it's perfect for any marine application. The advantages of TFT LCD are as follows: less energy consumption, visibility is sharper and has superb quality, physical design, response time, and less eye strain. This compact unit is easily mounted in a 3" round mounting hole and is IP66 rated and element proof to protect against dust, UV, temperature, water, corrosion & vibration.
